

TECHNICAL INFORMATION
CLOSED-LOOP
RECIRCULATION AND FILTRATION SYSTEM
RFS-25

Specifications:

- Capacity: 25 gallons of Rinse Water.
- Output: 6 GPM @ 56 PSI
- Voltage: 110VAC Single Phase / 230 VAC Single Phase
- Amperage: 0.5 HP/ 9.8A / 4.9A Full Load
- 3 Stage Filtration System:
 - Treatment Cartridges:
 - 2 ea 5 Micron Wound Fiber & Stainless Steel Filter
 - 1 ea 10 Micron Carbon Composite Filter
 - Stainless Steel Construction
- RFS-25 Footprint: 36" x 36" x 24"
- Additional Features:
 - Zero Discharge Operation (No stack emissions or waste stream)
 - Closed Loop Operation with JNJ Stencil Cleaner
 - Indefinite re-use of rinse water
 - Stainless Steel Cabinet
 - Low Level Protection
 - Timing circuit for Recirculation Filter
 - Ease of Operation
 - Power Pump to Waste Collection Point
 - Automatic Operation. (Supply on demand)
